Objective:

Motivated first-year engineering student at UConn seeking a Summer 2026 engineering internship to gain hands-on experience in robotics and related fields. Eager to apply problem-solving skills, learn quickly in team environments, and contribute with a strong work ethic and positive attitude.

Education:

University of Connecticut (UConn) — Storrs, CT

- Bachelor of Engineering in Mechatronics, Robotics, and Automation Engineering (*In Progress, Expected 2029*)

Relevant Coursework —

- Calculus I, Introduction to Programming (Python), General Chemistry, Introductory Electrical Systems, Workshop/Design Foundations,
-

Achievements:

- Graduated high school with **3.97 GPA** (High Honors)
 - **Connecticut Association Board of Education (C.A.B.E.) Student Leadership Award** – April 12th, 2021
 - For distinguished leadership in school activities in daily life.
 - **Frank J. Roberts Award - Tomlinson Middle** – June 18th, 2021
 - For exhibiting outstanding characteristics of effort, attitude, responsibility, and excellence in all Unified Art classes for three years.
-

Skills:

Technical Skills:

- Carpentry and fabrication (benches, shelves, outdoor structures)
- Basic Python programming (coursework)
- CAD Basics & Fundamentals
- Tools, measuring, and construction fundamentals
- Organization and workspace management

Soft Skills:

- Teamwork and understanding
- Fast learner with attention to detail and a problem-solving mindset
- Strong work ethic, reliability, and adaptability

Projects / Hands-On Work

- Designed and built indoor and outdoor wooden structures using basic CAD planning and measurements
 - Assisted in electrical installation and plumbing repairs, learning new construction techniques quickly
 - Automation Bot (Python): Developed a command-based program that processes user input and generates automated responses using structured logic and event handling.
-

Work Experience:

1st:
